**B) TOUCH & SENSE THE STEREOGNOSIS BAG**

Put some familiar objects in a cloth bag and close the bag. Be sure children do not see you putting the objects in the bag. Ask children to close their eyes, let them feel the bag nicely with their fingers and recognize the objects.

To start with just a small plastic ball may be used. Pencil, rubber, different vegetables like carrot, turnip, an apple or an orange can be used.

**C) SMELL, FEEL&TOUCH**

Introduce the children to a few things with a distinct smell e.g. rose, onion, soap, etc.

Cover one of the objects with a cloth, be sure the child does not see you covering the object - let the child smell and recognize the object.

Fruits like an apple or a banana may be covered and the child with the eyes closed or blind folded may touch and smell and recognize the object.

**D) TASTE&FLAVOURS**

After children are introduced to different tastes e.g. sweet, sour, bitter, hot (chilli), salty give the child one object (only one at a time) to taste and identify

**E) PHYSICAL DEVELOPMENT**

1. Make the children stand in a circle and pass the ball.
2. Children may sit down on a carpet and pass the ball.
